Team Meeting Breakdown

Libravos

November 09 2019

Technologies:

We are going to proceed with AWS, React Native, React, and Node.js.

We are applying for the AWS startup package and will let you all know when we hear back.

Links for Learning

- React Native:
    - Learning React Native: https://facebook.github.io/react-native/docs/tutorial
    - App sync for React Native: https://aws-amplify.github.io/docs/js/api
- React:
    - More in-depth: https://reactjs.org/tutorial/tutorial.html
    - Complete basic: https://www.w3schools.com/react/
- AWS:
    - Go through this entire tutorial to start building understanding: https://serverless-stack.com/
- App Sync:
    - General overview: https://aws.amazon.com/appsync/resources/
    - A helpful article: https://tylermcginnis.com/building-serverless-react-graphql-apps-with-aws-appsync/
    - Long video, but it shows everything you will need to know for aws appysnc: https://www.youtube.com/watch?v=QEMfnr5MO1w

Stay tuned for the skills workshops.

Code Jam

Teek and I will be there, feel free to join in. We will arrange for a team meeting next week in Trottier during the code jam so stay tuned.

Lean startup this Thursday

First session of Lean Startup this Thursday. Everyone should feel free to attend.
